

CSCI 215: Website Programming

Project – Milestone 2 – Structure, Function, and Content

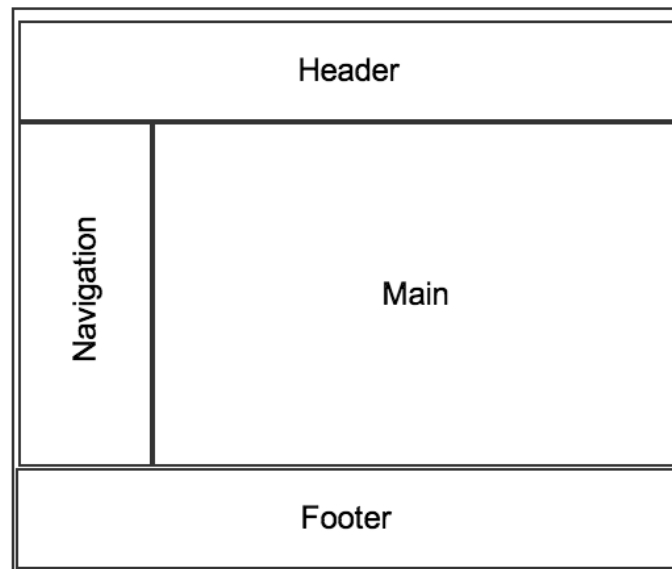

Collaboration Policy: Individual Assignment

Page Length: minimum of 1 page

Submit as: PDF document

Purpose: Visualize the structure (i.e. layout) and content of your project. You may use a software drawing application like PowerPoint, Word, or Visio, or an online drawing application like Gliffy (www.gliffy.com) to visualize how your project look and function before you code it. Taking a picture of a dry erase board will not be accepted.

For each web page in your project you shall provide a wireframe diagram that outlines the how the web page is structured and the content and functionality that will be provided. An example on is provided below.

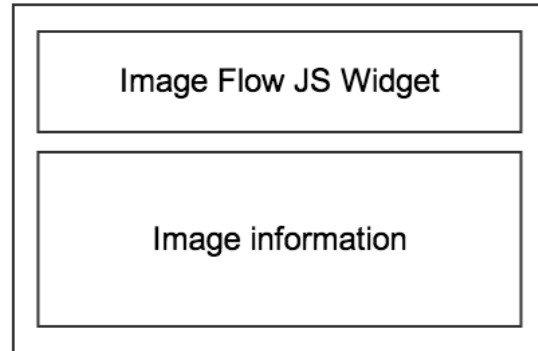

For each frame in the wireframe a brief description will be provided that describes the content (graphics, info, links, etc.) and the functionality (user interaction, dynamic creation, animation, etc.) that will be provided. The description of each frame maybe in bullet format (see below).

- Header will ...
- Navigation will ...
- Main will ...
- Footer will

If one frame has more than one purpose, please provide a separate wireframe for it. An example is provided below

Main Frame

Late assignments will not be accepted – no exceptions (please do not email me your assignment after the due date, I will not accept it).

Please feel free to setup an appointment to discuss this milestone assignment. I will be more than happy to listen to your approach and make suggestions.

Lastly, if you're unsure about any aspect of this assignment, you must ask! It is your responsibility to flush out questions you may have about the assignment prior to the due date. I can't help resolve an issue, or add clarity, if you don't ask.
