CSCI 215: Website Programming

Project – Milestone 3 – Completed Project

Collaboration Policy: Individual Assignment

Submit: Two Dropbox options
1. Upload a zip file containing all the files (html, js, images, css, etc.) required to fully execute your project in a standard web browser (e.g. Chrome, Safari, etc.).
2. URL location to your completed project (e.g. cougar student website). The URL must fully execute your project in a standard web browser.

Annotate Code: In the submitted JavaScript, HTML, and CSS files please annotate (i.e. make comments) what you accomplished (i.e. the code you wrote), and what was provided to you by an existing JavaScript library, or HTML/JavaScript framework. If not clearly annotated, the assignment will not be graded. It is important for me to know what you did.

Presentation: On April 21st or April 23rd you will present your project to the class. You will be given 2 to 3 minutes to describe what your project does, your coding contribution, and a live demonstration of your final project.

Have fun and if you have any questions please setup an appointment to discuss.
